33 Real Estate Improved

California Leading in Education Scope California has definitely taken the lead from all her sister states in the matter of education, in the opinion of Dr. Ernest Burnham, noted educator, at present on the Summer Session faculty of the University of California at Los Angeles.

34 Real Estate: Unimproved

CALIFORNIA leads the nation in her determination to give the benefits of state education to all persons, both children and adults," he declared. "Not only is the state making adequate provision for the education of all normal citizens but she is also doing a pioneer work in training of those handicapped by nature or lack of familiarity with the nation's customs and language, in other words, foreigners."

Dr. Burnham, Director of the Department of Rural Education in the Western State Normal School at Kalamazoo, Mich., pointed out that this state gives more adequate support to all its schools than any other state, with the possible exception of Maryland. In addition, he declared, the state approaches a nearer standard of justice in the comparative support it offers to urban and rural schools than all other states. Rural schools, as a result, are much better and have much higher standards in this state than in others.

Adequate financing, combined with the emphasis on adequate academic and professional preparation of teachers and professional supervision, he added, has resulted in a conscious professional pride and dignity throughout the state's teaching staff, a condition which has been reflected in the educational standards of the state.

C. of C. Arranging Industrial Exhibit

Torrance's industrial plants and commercial establishments are being given an opportunity to exhibit their products and wares in the Torrance Chamber of Commerce building. Four big glass show cases have been installed, and Secretary Carl L. Hyde has issued an invitation to Torrance industries and vociferous will appear on the program.

Torrance Woman's Club subscribed 100% toward the establishing of the new headquarters.

Mr. and Mrs. Paul Beaver of 262nd street spent Sunday with friends at Hollywood.

During recent years American interests have awakened to the fact that while we are actually waiting our petroleum foreigners are conserving theirs. This realization has sent American operators vigorously in search of foreign concessions. In many quarters they have found signs forbidding operations by foreign oil companies. Our State Department did induce the Anglo-Persian Oil Company, which is controlled by the British government, to grant several American companies production rights in Mesopotamia. But in many other rich regions our producers have been told in no uncertain terms to get out and stay out. Now, however, the Standard companies seem to have won an advantage in Russia, which indicates that when the Soviet is ready to grant concessions in Bakia interests and other groups, including the Standard Oil Company of New Jersey. Evidently the Standard of New York and the Vacuum do not feel obligated to abide by an agreement entered into by the Standard of New Jersey. They evidently will insist on their separate corporate identities in order to capitalize the Russian opportunity.

Deterding's companies themselves broke the Russian boycott agreement in 1923 and Deterding publicly excused the action, with the astonishing statement that he was forced into it by the British Government, which wanted no fly in the ointment on the renewed trade relations with the then recognized Soviet. Now that those relations have been sundered and Moscow's anger at everything British has dealt the American companies a high trump, there is no rule in the book of oil warfare, as it has been waged for thirty years to dictate that this card should not be played.

THESE are the days when every dawn is significant as an anniversary to veterans of the A. E. F. Nine years ago American divisions were driving the Germans northward out of the Chateau Thierry bulge and back across the Vesle. On July 18, 1918, two American divisions, the First and Second, operating with a French unit of black Colonials, slashed a deep dent in the German line south of Soissons in a terrific battle that marked the turning point of the war. From that date forward the enemy flung no more offensives at the Allied front.

From now until the middle of November every day will bring back to American veterans vivid memories of St. Mihiel, the Ourra, the Vesle, and the bitter struggle through the rain-soaked tangles of the Argonne. These memories have more significance this year than usual, for in September thousands of American veterans will return to France for the American Legion convention. We hope that from this gathering of old comrades in arms a new understanding will arise, that French and American veterans will recall the generous spirit of the war, the quick sympathy and enthusiasm with which in those days we were greeted, the respect and admiration we felt for the glorious army of France and the unbreakable spirit of the French people, that all the pin pricks, all the lost illusions, all the dreary post-war cynicism will fade before the fresh reminders that once we fought side by side in a good cause, that we were proved together in the crucible of war.

SECRETARY HERBERT HOOVER'S Mississippi flood control program as outlined in a report to President Coolidge, strikes a happy compromise between proposals sponsored by opposing schools of engineers. For years opinion in the Mississippi Valley, where the peril of flood is seldom forgotten, has been sharply divided as to the most effective methods of controlling the waters of the great river. One school has insisted on levees only. The other has contended that levees should be discarded and a system of spillways or by-passes installed. The Hoover recommendations incorporate the merits of both systems into a proposal for higher and wider levees, extension of dikes along some of the Mississippi's most turbulent tributaries, levee safety valves, in the form of spillways, and "the possible erection of emergency flood basins."

Since the rampage of
